

Storyline modification guide

Tuesday, December 27, 2016 9:59 AM

The following text can be updated with the correct text information to remove the Course specific information from the Articulate player (see red circle text).

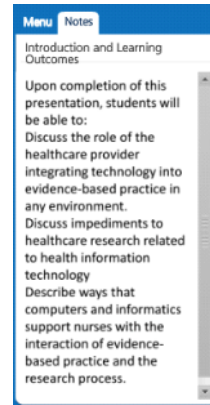

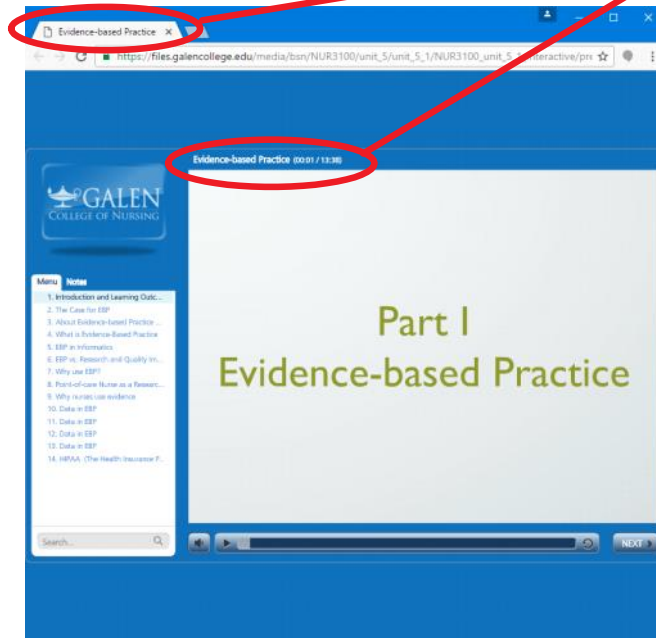

This information and its usefulness may vary depending on the version of the published presentation that was used. Please note: This does not allow for the modification of the actual content of the presentation.

Warning:

When editing any of these files it is important to back up your presentation in case you break it!

Formatting should be kept exactly to the source material. Also special characters cannot be added to the .js files.

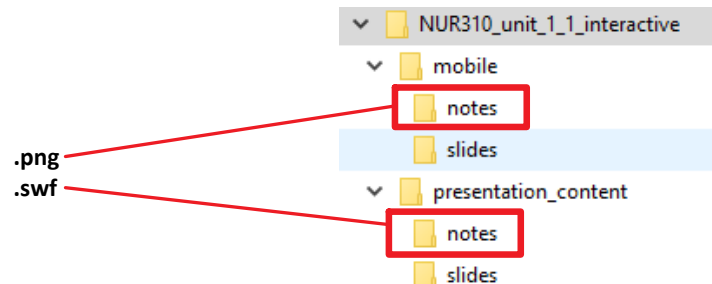

areas that can be updated. Example originally said "NUR310_unit5_1"

Note:

If the PowerPoint had any information regarding unit # or course # in the notes Section then it will most likely be carried over to the player notes as well.

If you need to edit this information, two sets of identical content are produced. (.png and .swf formats). Both are found under the notes directory of the published presentation.

Name
